Outdated Material
By Brian P

Considering this is the 'Official' book for the certifications, it needs to be updated to version 2 though I would skip that and do a full rewrite of the material if I was the publisher. The online resources are no longer valid and most of the tools referenced have been EOL for several years. Don't expect to learn anything but theory in this book because most of the technologies have evolved and patched. The C|EH exam is up to version 8 and 5 years on the Internet is a lifetime for most technology.

Look elsewhere
By Glenn C.
I have all 5, I bought them for a class, and they are terrible. They are poorly written, horribly outdated, and the production values are nonexistent. Many of the pictures and diagrams look like they were photocopied and taped into the book, and there is no coherent progression of the information. Each tidbit of information is given in an arbitrary order with no rhyme or reason; there's no "flow" from one thing to the next, just random factoids. And when I say outdated, much of the information is at LEAST 10 years old, and there is little mention of any of the new developments, even things that happened a couple years before the time of printing. If you need these for a class, get other books to supplement these. If you're just interested in the subject, look elsewhere.

NO REFLOW on kindle
By D. Bushmiller
This is not your typicall kindle version where you can reflow the text to suit your level of vision. The pages do not reorient correctly. So just from a readable standpoint don't waste your time with the Kindle version.
