This book, based on lectures given at the Polytechnic of Milan, gives a broad overview of the field of polymer dynamics. In these lectures the aim is to stress the fundamental concepts of the behaviour of polymers without drawing on the more advanced mathematical formalism which often obscures the natural elegance of the subject matter. Professor De Gennes is one of the most distinguished workers in the field of material science. Therefore this book will be welcomed by both the experienced researcher in the area and the interested layman. It will be of particular value to graduate students.

A must read book for any one working in the field of polymer

By A Customer

A must read book for any one who wants to do serious work in fields of Polymer dynamics. It contains idea about lots of problems in this field to be worked out. The book gives a insight of the subject rather than giving too much emphasis on mathematical details.
