Call it sustainable landscaping, ecological gardening, or the loftier-sounding “gardening for the new century.” Whatever label is affixed to it, naturescaping is really just a matter of good old common sense. When viewed in terms of an ecosystem with its own natural ebbs and flows, residents, and resources, backyard gardens thrive when they are designed, maintained, and enjoyed with a natural approach that eschews the overly managed, sterile, and environmentally harmful manicured landscapes so often found in suburban neighborhoods. A dedicated landscape designer, author, lecturer, and instructor, Young breaks down the often daunting process of analyzing and evaluating sites and conditions through an extensive series of thought-provoking questionnaires and step-by-step worksheets that will help novice gardeners, professionals, or anyone in between who wishes to swap their existing gardening regimen for a more environmentally friendly form of landscaping. Practical advice about materials, soil, and plant selection is augmented by inspiring photographs by Karen Bussolini and instructive illustrations to seamlessly guide gardeners through the rewarding process of working with nature’s bounty and beauty. --Carol Haggas

Excellent Guide to Creating a Wildlife-Friendly Garden

By Amazon Customer

Finally, a book about creating welcoming habitat for wildlife in your garden that makes sense! I have read so many books about landscaping for wildlife and have often been disappointed at the number of invasive plants that these authors continue to promote.

The Naturescaping Workbook: A Step-by-Step Guide for Bringing Nature to Your Backyard by Beth O'Donnell Young will help you attract birds and butterflies, reduce maintenance, eliminate pesticides, create a backyard retreat, and design a beautiful garden full of life.

This book is chock full of gorgeous photos illustrating every step that Beth Young describes. You'll come

away with lots of ideas for designing your wildlife garden just by paging through and looking at all of these stunning pictures.

But Beth Young has also included step-by-step worksheets to help you:

- Identify what you want and need
- Discover your backyard biohabitats
- Create a landscape plan
- Choose the perfect plants for your wildlife garden
- Work with the water you are given
- Attract wildlife
- Identify earth-friendly materials
- Build healthy soil
- Steward your land

By the time you complete these worksheets and read the accompanying chapters in *The Naturescaping Workbook* you will be well equipped to design your own Beautiful Wildlife Garden, full of birds, butterflies, bees, frogs and toads, insects and other critters.

Chapters walk you through the whole process of designing a beautiful garden for wildlife:

- Know Your Place -- Start with what you have and explore your wants and needs
- Go With the Flow -- Keeping water on your land and be water wise
- Match Plant to Place -- Inventory plants you already have, know your soil, map out your specific biohabitats, and start your plant list
- Welcome Wildlife -- Plan to meet the four basic needs, and let nature do all pest control
- Choose Sustainable Materials -- Think before you buy and get to know the facts about popular materials
- Put Your Plan on Paper -- Formulate your design goals, draw your landscape plan, and make your planting list
- From the Ground Up -- Clear the land, lay it out, build your soil, add your hardscape, and start planting
- Become a Steward -- Water efficiently, garden organically, prune for plant health, and understand weeds

In *The Naturescaping Workbook* Beth Young encourages gardeners to think in terms of whole ecosystems not just individual plants to have:

"...a naturescaped backyard is a place that teems with life and health, wastes nothing, and thrives on just what's offered by its soil and climate. It's a lively outdoor space, full of bugs and birds, that nourishes our great hunger to be in contact with nature while it contributes at the same time to the health of our earth. Working in a naturescape is not a chore, it is a labor of love." ~ Beth O'Donnell Young

The Naturescaping Workbook: A Step-by-Step Guide for Bringing Nature to Your Backyard

Each year, I assist educational groups wanting to develop a garden to welcome wildlife, improve habitat and create a meaningful outdoor learning experience. This workbook will be quite helpful for those planning the garden! Good companion for Doug Tallamy's book *Bringing Nature Home*.

Perfect book to bring your backyard to life.

By jamaro

This book is great and very informative. Full of great advises and awesome ideas for your backyard. I learned a lot about bringing many types of wildlife to my backyard. Thanks to what I have learned on this guide, I have many birds and beautiful butterflies everywhere in my backyard.

This book was selling at my local gardening store for 25 dollars and thankfully I found it on here for a fraction of the cost. I am very pleased.
