Better Understanding Now of What Men Want

By BookReader

The author of this Kindle book (a man) was very transparent about what men want when they are in a relationship with a woman. Surprisingly, there's very little about sexual things, which I greatly appreciated. There are a lot of really good tips about how men want to be treated in relationships that I am sure will be very helpful. It was refreshing to read a well written Kindle book on this subject, as I desire to be all that I can be when I am in love. This book is well worth the little it costs.

Think about this...most men don't really open up and share their feelings very well. The author of this book has really revealed many secret things that men desire from women.
